TIMBER MERCHANTS

SHED, WAREHOUSE OR YARD... TOTAL SUPPORT FOR YOUR BUSINESS

SHED, WAREHOUSE OR YARD.. TOTAL SUPPORT FOR YOUR BUSINESS

One trading location to multi-sites - we design, manufacture and install.

A total solution

We fully understand the storage requirements of a timber merchant and as such - designing effective solutions for your yard, warehouse or shed is second nature to us.

The market now dictates that timber merchants need not only service the supply requirements for traditional hardwood and softwood products, but have also had to expand into panel and advanced technical panel products requiring more specialist storage solutions.

Our experience of the timber trade spans over 5 decades, having developed the knowledge and know - how we work closely alongside each client in order to design optimum solutions to solve any storage challenge.

PANEL PRODUCTS

Our expertise in this sector is well established from supplying the UK's leading importers, distributors and stockists over the last 55 years .

With a vast and ever increasing range of panel based products available in today's market, varying from plywood, chipboard, MDF, flooring products, worktops, laminates, fibreboard, door blanks to decorative products.

We design and install a total solution that enables cost effective storage and handling of all types of panel products. Our experience of working in conjunction with specialist handling equipment suppliers ensures that compatibility of rack and truck are never compromised.
